Summary

Network engineer with a special interest in microservices and container orchestration, driven by passion for Kubernetes and software automation, I have contributed to multicloud solutions development, troubleshooting complex systems and engaged in mentoring and knowledge sharing projects. Currently pursuing the CCNP Automation certification to increase my skills in networking field.

Skill Highlights

- Complex projects handling
- Infrastructure as code
- Cloud Providers (Azure, AWS)
- Networking
- Customer oriented
- Observability
- Containers and Kubernetes
- Python, Go

Experience

Devops Engineer - 04/2026 to Present
Data Management, Magna Electronics SRL

As part of Data Management team I was involved in technical project for customer's data classification. Actively contributed to implementation of data scanning infrastructure based on Diskover/ElasticSearch.

- Implemented Docker based Elastic/Kibana for datalake handling.
- Building Kibana dashboards to showcase the required project details;
- Development of Python scripts to handle data analysis, changes and filtering;
- Automate the installation process with Ansible playbooks

Senior Devops Engineer - 10/2024 to 03/2025
Application Management, Endava Romania SRL

- Outsourcing of DevOps projects in Payments industry.
- Troubleshooting of CI/CD Build Pipelines based on TeamCity and GitHub
- Involvement in Learning and Development project focused for AWS Cloud Practitioner certification for internal departments.

Senior Cloud Engineer - 04/2024 to 08/2024
Cloud Operation Services, Atoss Software SE

- Platform management and maintenance for company infrastructure in Azure , AWS and on premises.
- Managing Networking and Kubernetes Infrastructure, periodical updates, backup and deployments as business requirements. Proficiency in AKS, Azure Firewall, Application Gateway, Container Registry.
- Adapting and new implementation of Azure DevOps pipelines in accordance with internal automation projects for infrastructure.
- Developing automation scripts for use within COS Team with functionality like monitor Azure SQL database latencies, automatic change of Application Gateway certificates, automatic build and deploy of custom Docker images in K8s environment, automatic update of Nginx ports based on a predefined configuration.

Projects:

- Successfully migrated one of the company flagship applications from Azure into AWS environment, including the adaptation to a different Database engine (MariaDB).
- Define the project goals and writing Terraform code to implement a new Azure region with complex infrastructure requirements.
- Creating a PoC for using Azure DevOps agents inside a Kubernetes cluster.

Support Engineer - 09/2021 to 04/2024
Azure Containers Team, Microsoft Romania

- Technical Support for Premier and Rapid Response customers on Container Technologies: Azure Kubernetes Services, Azure Containers Instance, Azure Container Registry, Managed RedHat OpenShift
- Providing technical support and collaboration for Azure technical stack: Storage, Entra, Computing, Networking, Databases
- Involved in highly complex customer environments, troubleshooting process for containers technology, simulating customer environments, escalation contact with engineering teams.
- Mentoring activities for new hirings in Azure Containers Team
- Collaboration for developing internal documentation (Wiki), troubleshooting guides, providing technical session within EMEA team for technical topics.
- Developed tools and scripts for automation of our processes and troubleshooting scenarios.

Projects:

- Growing Technical Together – Local collaboration project for Romania team members, technical presentation and technical triages;
- Mentoring new team members and providing support to other Azure teams;
- Participate in Virtual Teams during platform outages, supporting our

customers in critical situation.

Networking Consultant - 01/2021 to 15.07.2021
Infosys Consulting, Timisoara

- Troubleshooting networking related issues on enterprise level for EMEA customers, keep in touch with location SPOC and technology partners for fault investigation and remediation
- Automation of change requests and multiple devices configurations in customer's network with scripting tools based on Python – Netmiko, Napalm;
- Implementation of business partners connectivity solutions at datacenter level, configuration of dynamic routing and routing instances on Cisco IOS XR, Nexus, Juniper

Projects: Hardware Refresh Project 2021 – Replacement of access, distribution and WLC/AP for customer locations in Romania

- Networking automation scripts for daily operations providing preventive maintenance, configurations backups and restores, device monitoring and large scale device configurations

Network Engineer - 12/2019 to 09/2020
Continental Automotive Romania, Timisoara

- As part of a global team of Network Support Center engineers, I was involved in providing technical support for corporate WAN infrastructure;
- Troubleshooting and maintenance of networking technologies: DMVPN, Cisco Performance Routing, QOS, DMVPN, Remote Access Services
- Working with network management and monitoring platforms: Live Action, Kibana, Elasticsearch
- Development of network automation scripts in Python for monitor local and remote services, Rest API and process automation, SQLDB, Napalm, Ansible, Netmiko;

Networking Engineer - 11/2017 to 12/2019
Telekom Romania Communications, Timisoara

- Installation and configuration of Networking and Telecommunication Devices in customer premise and Datacenter.
- Service and maintenance for end to end telecommunication devices.

IT Consultant - 02/2017 to 07/2017
SC ITPS SRL, Timisoara

- Installation and configuration of Cisco Routers and Switches, Juniper L3 Switches, Allied Telesis, Fortinet
- Configuration of remote access and firewall policies, IpSec GRE Tunnels, Single/Multi Homed BGP implementation, RSTP/MSTP, VRRP

Projects:

- Dual Multihomed BGP Implementation with separate service provider EBGp session and internal iBGP session for a utility company
- Migration project from 2xCisco 3750 to 2xJuniper EX-4300 Series, including IOS to Junos syntax conversion, protocols migration (HSRP to VRRP) and network interoperability with the remaining networks, mainly Cisco based;

Electrical Engineer – Administrator 06/2015 to 02/2017
SC Conectel Comunicatii SRL, Timisoara

- Electrical Installation, electrical distribution boards, low voltage systems and automations.
- Building fiber optic distribution networks, construction of WAN and LAN networks
- Field technical support for device installation, commissioning and troubleshooting
- Installation of CCTV, security systems, smart home systems

Senior Field Engineer - 05/2005 to 05/2015
SC GTS Telecom SRL, Timisoara

- Construction and maintenance of GTS Telecom's fiber optic networks for services of IP, SDH, DWDM in metropolitan networks (Timisoara, Arad, Oradea, Cluj and Deva)
- Installation and upgrade tasks for fiber optic cables and radio communications.
- Field technical support for telecommunication services

Projects:

- Upgrades and Network swap of GTS Telecom DWDM network on country level Planning, construction and migration of fiber optic cables in underground infrastructure provided by municipalities of Cluj Napoca
- Project management of PoP and Datacenter building as of environment and communication infrastructure

Studies

Ioan Slavici University of Timisoara
09.2016 – 06.2018

Applied Informatics Department

Bachelor Degree in Computer Engineering

Networking and IT Courses and Certifications

- C++ Programming at IT School Timisoara --2008
- **VMWare** vSphere Foundation Course – Bit Academy
- **Cisco Certified Networking Associate**
- **JNCIA – Juniper Networks Certified Internet Associate**
- Ciena RS4200 Turn Up & Test – Coventry UK
- Alcatel-Lucent SR-OS Implementation
- AWS Certified Cloud Practitioner
- Azure Fundamentals AZ-900 (Jan 2021)
- Silver-Peak Certified SD-Wan Professional (Feb 2021)
- Silver-Peak Certified SD-WAN Expert (Mar 2021)
- Fortinet NSE7-SD-WAN Course (Mar 2021)
- **Juniper JNCIA-DevOps Certification (Mar 2021)**
- **Juniper JNCIA-Cloud Certification (Apr 2021)**
- AWS Certified Solution Architect Associate SA-C02 (June 2021)
- Azure Administrator Az-104 (Dec 2021)
- **Azure Networking Az700 (March 2022)**
- Azure Certified Developer (Feb 2023)
- Azure Solution Architect Expert (April 2023)
- Certified Kubernetes Application Developer (Sep 2021)
- Certified Kubernetes Administrator (Sep 2022)
- Certified Kubernetes Security (January 2025)
- Autocad 2D Training with Atelierele Ilbah
- As of March 2025, part of Kubestronaut community, holding complete 5 certification of CNCF – Linux Foundation.
